CQI´S

Objective:

Training focused on improving manufacturing, the content is related to the Automotive Industry with specific requirements from General Motors. One by one, 30 elements are fully explained in a simple way to help attendees visualize the correct implementation in their facilities.

Benefits:

Develop a Management System in each of the special processes effectively and efficiently, focusing on defect prevention, process variation reduction, and waste reduction throughout the supply chain.

Competencies:

At the end of the course, the participant will be able to:
You will know, understand, and be able to demonstrate compliance with specific CQI requirements.
You will perform a self-assessment of the organization's warranty management processes.

Target audience:

Training.
Maintenance.
Materials.
Design, manufacturing, tools, and quality engineering.
