

# RUN AT RATE

## **Objective:**

The participant will understand the purpose of Advanced Product Quality Planning (APQP) and Production Part Approval Process (PPAP). This course is designed to understand the specific requirements of GM. Participants will obtain and understand the basic industry requirements to achieve part approval from their customer, which ultimately translates to launch excellence.

## **Topics:**

GM 1927-35 Key Concepts  
Process flow diagram  
Identification of constraints  
Practice in Run at Rate workbook  
Production capability  
Results  
APQP timing

## **Targeted audience:**

Design engineering, manufacturing, tools, quality  
Production supervisors  
Quality auditors  
Training  
Maintenance  
Customer satisfaction  
Materials.
